BUSH ROSES

No. 1 grade 65c each.  
No. 2 grade 40c each.

Ours are Salem-grown acclimated Rose Bushes.  
Angele Pernet—Coppery orange-yellow.  
Autumn—Burnt orange.  
Austrian Copper—Single-shrub rose. Copper-red on one side and yellow on reverse.  
Ami Quinard—Very dark red. Fragrant.  
Betty Uprichard—Copper-pink.  
Bouquet—Floribunda with rose-red blooms. Grows 2 to 2½ ft.  
Catalonia—Vermillion.  
Caladonia—White.  
Cecil—Single. Yellow. Large flowers.  
Cecile Brunner—Tiny double pink.  
Chas. P. Kilham—Oriental red suffused with orange.

Conqueror—Saffron yellow.  
Christopher Stone—Blazing crimson. One of best Roses of recent years.  
Condesa de Sastago—Bicolor. Yellow and raspberry-red.  
Cuba—Semi-double orange scarlet.  
Dame Edith Helen—Well formed, shell pink.  
Dainty Bess—Best single. Rose pink.  
Dorothy James—Chamois-pink. Two-toned. A new one.

Edith Nellie Perkins—Orange buff inside. Coppery pink outside.  
E. G. Hill—Large, fragrant dazzling scarlet.  
Etiole de Hollande—Dark velvety red.  
Ellen Poulsen (polyantha)—Dark pink.  
Erna Teresendorf (polyantha)—Pink.  
Faience—Bicolor of pink and yellow.  
Feu Jos. Looymans—Bronzy yellow.  
Frau Karl Druski—Large white.  
Frederico Casas—Orange-red and yellow.  
Girona—Turkey-red and golden yellow. Somewhat on Talisman order.

Golden Dawn—Sunflower yellow.  
Golden Emblem—Golden yellow.  
Golden Gleam—Yellow.  
Golden Ophelia—Yellow.  
Golden Salmon (polyantha)—Orange-scarlet.  
Heinrich Wendland—Golden-yellow and nasurtium red on opposite sides of petals.  
Hinrich Gaede—Beautiful copper-orange.  
Hadley—Rich crimson.

Improved LaFayette (Floribundi)—Large glowing red in loose clusters. Constant bloomer.  
Imperial Potentate—Beautiful pink.  
Innocence—Single white.  
Irish Elegance—Single. Bronze pink.  
Irish Fireflame—Single. Orange-red.  
Isobel—Single. Orange-pink.  
Jonkheer J. L. Mock—Pink.  
Joanna Hill—Light yellow.  
Mme J. Perraud—Large, double orange flowers.

Kathleen Pechtold—Long buds of old gold and orange and copper.

Karen Poulsen—Single. Unfading red. Continuous bloomer.  
Koralie—Floribundi. Great clusters of red-dish-rose flowers.

Lady Hillingdon—Long buds apricot.  
Los Angeles—Flame pink.  
Lulu—Slender buds of coral-apricot. Finest boutonniere rose.  
Mayor Baker—Showy orange-scarlet.  
Margaret McGreehy—Large orange-scarlet.  
Mabel Morse—Clear yellow.  
Martha Lambert—New. Everblooming shrub rose growing 4 feet high and same width. Single scarlet blooms.

Mme. Edu Herriott—Coral pink shaded yellow and scarlet.  
Mme. Caroline Testout—Clear pink. The "Portland Rose."

Mme. Jules Bouche—White.  
Mrs. E. P. Thom—A fine yellow.  
Mrs. P. S. Dupont—Fine yellow with pointed buds.  
Mrs. Sam McGreehy—Copper-orange flushed red.

Mrs. G. A. Van Rossen—Yellow with orange-brown veins.  
Night—Very dark crimson.  
Padre—Brilliant coppery-scarlet.  
Picture—Fine new pink.  
Poinsetta—Long buds of poinsetta-scarlet.  
Portadown Ivory—Long, perfectly shaped bud opening ivory white.

Pres. Hoover—Orange-scarlet.  
Rapture—Pink. An improved Butterfly.  
Red Ripples—A new floribundi. Intense vivid red long lasting blooms.

Roslyn—Golden yellow.  
Sequoia—Light yellow, suffused apricot.  
Senori Gari—Gold, buff and apricot.  
Southport—A fine red.  
Sunshine (Floribundi)—Orange scarlet. Constant bloomer of tiny roses.  
Sou. de Mme. C. Chambard—Outer petals rose red; inner petals rose-pink. Fragrant.  
Talisman—Mixture of red, yellow and copper.

The Doctor—Silvery pink, long pointed buds. Fragrant.  
Ville de Paris—Sunflower yellow.

CLIMBING ROSES

75c Each

American Pillar—Single. Apple-blossom pink. Vigorous.  
Apeles Mestres—Clear yellow. Large.  
Betty Uprichard—Copper-pink.  
Cl. Cecile Brunner—Tiny pink flowers.  
Cl. Yellow Cecile Brunner—Yellow flowers.  
Cl. Dainty Bess—Single. Rose pink.  
Cl. Etiole de Hollande—Dark red.  
Cl. Golden Emblem—Yellow. Vigorous.  
Cl. Hoosier Beauty—Dark crimson.  
Cl. Los Angeles—Coral pink.  
Cl. Lady Hillingdon—Long apricot buds.  
Cl. Mde. Edu Herriott—Orange and coral.  
Cl. Mrs. E. P. Thom—Yellow.  
Cl. Mrs. P. S. Dupont—Beautiful yellow.  
Cl. Mde Butterful—Light pink.  
Cl. Pres. Hoover—Vigorous. Orange-scarlet.  
Countess of Stradbroke—Unfading red. Everblooming.

Dr. Van Fleet—Flesh pink.  
Kitty Kinninmonth—Clear pink.  
Le Reve—Semi-double yellow.  
Mermaid—Large single, sulphur yellow.  
Mme. Gregoire Staechlin—Pink.  
Paul's Lemon Pillar—Best white climber. White with trace of lemon.  
Paul's Scarlet Climber—Great clusters scarlet flowers.

Reveille Dijonnias—Bicolor. Golden yellow suffused with pink. Different.  
Silver Moon—Very vigorous. Single white.  
Sou. Cladius DeNoyel—Velvety crimson. Recurrent bloomer. Fragrant.

TREE ROSES

\$2.00 Each

(Due to shortage of crating materials we cannot ship tree roses this season.)

Condesa de Sastago  
Christopher Stone  
Dainty Bess  
Dame Edith Helen  
Etiole de Hollande  
Hinrich Gaede  
Karen Poulsen  
Mayor Baker  
Mrs. Sam McGreehy  
Mrs. E. P. Thom  
Prs. Hoover  
Talisman  
The Doctor

For description of these varieties see bush rose list in this folder. Tree roses are best planted in December, January and February.

FLOWERING TREES

We have other flowering trees than those listed herein and in some varieties other sizes.  
Aldenhamensis Flowering Crabapple. Dark purplish-red buds. Red fruits. Bronzy foliage.  
Neidzwetskyana Flowering Crabapple—Pink flowers. Red fruit.

Scheideckeri Flowering Crab—Semi-double pink flowers.

Bechtold Flowering Crab—Slow growing tree. Semidwarf. Double pink flowers. (25c per tree higher than other crabs).

Kwanzan Flowering Cherry—Double pink flowers.

Pink Pearl Flowering Cherry—Double white flowers. Very fine.

Benigiri Flowering Cherry—Light pink flowers.

Pauls Scarlet Hawthorne—Great clusters tiny double red flowers in May.

Pink Hawthorne—Same as above except for pink flowers.

Carriere Hawthorne—Very slow growing trees, almost evergreen. White flowers but specular red fruits in winter. This is the tree planted around the sunken garden at the State Capital.

Vesuvius Flowering Plum—Red leaves, single light pink flowers.

Pissardi Flowering Plum—Red leaves. White flowers.

Blieriana Flowering Plum—Double pink flowers.

Salesyard Prices

3 to 4 ft. trees, \$1.00; 4 to 6 ft., \$1.25 to \$1.50; 6 to 8 ft., \$2.00 to \$2.50.

(Shipping—The two smaller grades can go forward parcel post. Add 25c to orders under \$2.50 and 10 percent to larger orders and we will ship prepaid parcel post. We can ship the larger grades by freight or express and buyer pays the freight on delivery.)

Double Weeping Cherry—On strong stems 5 to 6 ft. high, \$2.00 to \$2.50.

Pink Florida Dogwood—Very spectacular tree with pink flowers. Rather slow growing and makes a round headed tree. \$2.50 to \$7.50.

White Flowering Florida Dogwood—Similar to above but white flowers. \$2.50 to \$3.50.

SHADE TREES

We have other varieties not mentioned here. Also some of those described are available in larger sizes. We grow a large assortment of shade trees.

Cut-leaf Weeping Birch—A narrow growing tree with white bark. (50c per tree higher than other trees in this list.)

Chinese Elm—Fairly fast grower.

American Linden—A good parking tree. Medium growth.

Norway Maple—A hard maple. Fine parking and shade tree.

Mt. Ash—An erect growing tree with a fine fall show of orange-red berries.

Russian Mulberry—A tree with berries that resembles blackberries. Fine for birds.

Sycamore—One of the best street trees.

Redbud (Judas Tree)—Pink flowers before leaves.

Sassafras—A handsome shade tree whose leaves assume brilliant autumn tints. Pyramidal grower.

Tulip Tree—A beautiful tree with flowers of greenish-yellow.

Salesyard Prices

3 to 4 ft trees, 75c; 4 to 6 ft. trees, \$1.25; 6 to 8 ft., \$1.75; 8 to 10 ft., \$2.00 to \$3.00.

(Note! We can supply the above list in one size or another but do not have all of them in all the sizes quoted.)

FOR QUICK SHADE

European Birch—Upright grower with white bark.  
Black Locust—Very rapid growing.  
Oregon Maple—Our native big leaf maple. Makes a great spreading tree.  
Carolina Poplar—Upright growing.  
Lombardy Poplar—Narrow growing.  
Native Ash—For wet spots.  
Weeping Willow—A spreading tree of rapid growth.

Salesyard Prices

3 to 4 ft.....\$ .75  
4 to 6 ft.....1.00  
6 to 8 ft.....1.50  
8 to 10 ft.....2.00  
The two smaller grades can be shipped parcel post.

(These are salesyard prices. For mail orders to be shipped postage prepaid add 25c to any order of \$2.50 or under, for mailing costs add 10% of amount of order for amounts over \$2.50.

SALEM, OREGON

CATALOG-SEASON 1944 - 1945

Acclimated Western Oregon Grown Nursery Stock

We grow our own stock. They are  
Acclimated to Northwest Conditions

Rose Bushes - Berry Bushes  
Fruit - Nut - Shade Trees  
Grapes - Shrubs - Vines

DECIDUOUS SHRUBS

These are shrubs that lose their leaves in winter time. They are generally very colorful. Ideal for surrounding a backyard to provide privacy as well as color. Figures following name indicate average ultimate height.

Pink Flowering Almond—4 ft.  
Althea—6 to 8 ft.

Banner—White flowers with red eye.  
Lucy—Red.

Pulcherrima—Rose.

Deutzia—7 ft. Outside flowers pink, inside white.

Forsythia Suspensia—Yellow flowers, drooping, vine-light growth.

Morrow Bush Honeysuckle—7 ft. Creamy white flowers.

Hydrangea Arborescens (Hills of Snow)—4 ft.

Single Mock-orange—8 ft. White flowers.

Spirea Anthony Waterer—Pink flowers. 3 ft. Blooms all summer.

Pink Weigelia—6 ft.

Ocean Spray—8 ft. Creamy flowers in July.

Vine Maple—10 ft. Leaves have bright autumnal colors.

Above shrubs 75c each. These are generally bushy plants 2 to 3 ft. high but some of the slower growers will be a little under this size.

Red Leaf Barberry—4ft.

Beauty Bush—4 ft. Showy light pink flowers.

Snowball—7 ft.

Highbush Cranberry—7 ft. Showy berries follow white flowers.

Hydrangea P. G.—4 ft. Plume-like flowers.

Hydrangea Otaksa—4 ft. Pink or white flowers all summer; \$1.00 to \$1.50.

Kerria (Jap rose)—6 ft. Yellow flowers.

Purple Lilac—7 ft.

Double Mock-orange—Double white flowers.

Jap Quince—4 ft. Red flowers.

Spirea Thunbergi—5 ft. Very early white flowers.

Spirea Van Houtte—7 ft. White flowers after Sp. thunbergi.

Prices of above, \$1.00 each.

Viburnum Carlesii—4 ft. Very slow growing. The so-called "fragrant snowball." Highly fragrant pinkish flowers. \$2.50 to \$3.50.

Viburnum Burkwoodi—5 ft. Similar to V. Carlesii but more nearly evergreen, faster growing and looser balls of flowers. \$2.75 to \$4.00.

Budded Lilacs—\$1.50 to \$2.50. (For description of budded lilacs send for Camellia-Rhododendron descriptive list.)

Magnolia Soulangeana—\$4.00 up.

GIVE SHRUBS FOR XMAS  
"Give Gifts That Grow"

You can solve many of your gift problems in this year of scarcity of merchandise by giving living gifts—gifts that endure through the years.

Give Flowering Trees, Shrubs, fine budded Lilacs, Camellias, Rhododendrons, Pink Flowering Dogwoods, etc.

FRUITS — BERRIES — NUTS

The fellow who has a little piece of land should grow his own fruit, berries and nuts. He who grows it eats more of it. With prices as high as fruits are now few can afford to eat all they should of this class of products. They are easily grown. We advise November and December planting for best results and to insure getting the desired varieties in these times of scarcity.

The food reserves of the world are sadly depleted. We will be called upon to divide our limited production with the rest of the world, once Peace again comes.

Food will be scarce for years to come. The fellow who grows his own berries and fruits and nuts will feed his family better than he who grows nothing. He will help beat the High Cost of Living during these present years and he will also be prepared for the next depression.

STRAWBERRIES

Many Victory Garden planters are primarily interested in quick results. Berries get into production the most quickly of all nursery plants. Everbearing strawberries that are planted this winter or in the spring of 1945 will start producing fruit in August of the same year, provided they are well watered. Rockhill is the best of the everbearers. Its fruit is of high quality. Bears well. It produces no runners so cost of propagation of the plants is high and the nurseryman must get a good price for them. Gem and Mastodon, also everbearing varieties, make runners and are more cheaply produced. However, their quality is not as high as that of Rockhill.

The main crop strawberries, such as Marshall, Oregon, Redhearts, Fairfax, Dorsett and Corvallis bear the second spring. Planted in fall of 1944 or spring of 1945 they will produce in 1946. The bulk of a garden planting should be these varieties with just enough everbearing varieties for out-of-season use.

Strawberries are usually planted in rows 3 to 3½ feet apart and from 18 inches to 3 feet apart in the rows.

Salesyard Prices

Marshall, Oregon, Redheart, Narcissus, Fairfax and Dorsett—50c doz.; \$2.50 per 100; \$17.50 per 1000.

Gem Everbearing—60c doz.; \$3.50 per 100; \$25.00 per 100.

Rockhill everbearing—\$1.50 per dozen.

(These are salesyard prices. For mail orders to be shipped postage prepaid add 25c to any order of \$2.50 or under, for mailing costs add 10% of amount of order for amounts over \$2.50. Thousand lots go by freight, or express and buyer pays the transportatoin costs.)

CASCADE AND PACIFIC BLACKBERRIES

These are newly created varieties, being crosses between the Loganberry and the splendid small wild blackberry that is native to the Northwest. They have much of the quality of the Blackberry and have small seeds and are black. They have the large size and productiveness of the Loganberry, being even more productive. They are the finest pie berries grown.

They are grown just like Boysenberry. They fruit the second summer after planting.

The supply of these new berries is very limited.

Salesyard Prices

2-year transplants (available November till March)—35 each; 3 for \$1.00.

1-year tip plants (available November till \$1.50 dozen; \$10.00 per 100.

THORNLESS EVERGREEN BLACKBERRY

The evergreen blackberry is one of the heaviest producers in the berry list. Its fruit is excellent for jelly, jam and many use it fresh and canned. Its great handicap in popularity has been its terrible thorns. We offer a thornless variety. The same heavy producer of same quality berries but without thorns. Plant a plant. One plant will produce enough for the average family. Transplants, 50c each.

BOYSENBERRIES YOUNGBERRIES LOGANBERRIES

These varieties are handled alike. Commercially they are planted 8 ft. by 8 ft. and are trained on a trellis. In home gardens they are often planted 6 feet apart. Every garden should contain all three of these varieties. They start fruiting the second summer. Transplants are available about November 15th while tips are not ready until spring. As with most other fruits and berries fall planting is preferable. Such plants will have all winter to become established and one will lose fewer November and December planted plants and they will grow larger than spring planted stock.

Youngberries and Boysenberries are quite similar but by planting both one will have fruit through a considerably longer season.

Salesyard Prices

2-year transplants, 25c each; \$2.50 a dozen. 1-year plants (tips, available spring only), 15c each; \$1.50 dozen; \$10.00 per 100.

BLACKCAP RASPBERRIES

Blackcaps are usually planted about 5 or 6 feet apart. Each plant is tied to a stake. They produce more heavily per plant than do Red Raspberries.

Munger is a good table and canning variety. 2-year transplants—25c each; \$2.50 dozen. Tips (spring only)—15c; \$1.50 dozen.

GOOSEBERRIES — CURRANTS

These are set 4 to 6 feet apart in the row. If Fall planted they may have a few fruits the first summer but generally their production starts the second summer. Every garden should contain at least half dozen each of these varieties. Currants are a very good commercial proposition. Wineries are bidding for this fruit and there is not enough grown to satisfy the demand.

Salesyard Prices

35c each; 3 for \$1.00.

Guarantee. We guarantee all stock to be true to name. We exercise the greatest care in delivering only first class, true to name stock and hold ourselves in readiness to replace any that may prove to be otherwise, upon proper proof. But at no time will we be held liable for an amount greater than the original price. We make no guarantee to replace any stock that may fail to live, since we have no control over conditions after the plant leaves our hands.

THORNLESS BERRIES

We offer thornless plants of Youngberry, Boysenberry and Loganberry in tip plants available only in spring. These have the same berries and other characteristics as have the common thorny varieties but the canes are smooth and thornless. 1 yr. tips (spring only) 35c each; 3 for \$1.00.

RASPBERRIES

Red Raspberries bear nothing the first summer; a part crop the second summer and a full crop thereafter. Commercially they are spaced four feet by eight but in intensively cultivated home plantings they are often planted two feet apart in the rows. We advise planting several varieties for home use. This often lengthens the season. Cuthbert is the old standard. It has high quality and fair production. Newbough and Taylor are newer varieties that produce immense fruits of good quality and bear very heavily. Lloyd George is a fine berry, nearly as large as the above two varieties and very productive. Where well watered it often produces a good fall crop also. Latham is a standard variety of good quality. St. Regis is an everbearing variety. It produces both spring and fall crops. A few of the latter are desirable for out-of-season berries.

Salesyard Prices

2-year transplants—15c each; \$1.50 dozen. Suckers—\$1.00 dozen; \$6.00 per 100.

Willamette Raspberry is a new introduction of the U.S.D.A. from Corvallis. The berries are 60% larger than Cuthbert, being somewhat larger than the large Newbough. Good bearer. Fruit is dark red, firm and not crumbly. Cans equally well with Cuthbert. Good for table and freezing as well as canning. Stock of this new berry is limited this year.

Willamette Raspberry Prices

1-year plants—\$1.50 dozen; \$10.00 per 100. 2 year transplants—\$2.50 dozen.

GRAPES

Grapes are planted 6 to 8 feet apart and are best trained on trellis so that they can be properly pruned. Not much is expected from Grapes until the third summer but they bear bountifully once they start bearing. Plant a number of varieties to obtain fruit through a long season.

We offer the following Grape varieties:

Campbell Early (Island Belle)—Early large blue.

Worden—Mid-season. Large blue-black. One of best juice grapes.

Concord—Follows Worden in ripening. Blue.

Niagara—Green or white variety.

Golden Muscat—A fine sweet, California type grape that succeeds here (75c each).

Salem—Good size clusters of pink fruit.

J. J. Hubbard—Blue.

Fredonia—A recent variety. Good quality. Blue.

Urbana—Recent. Pink. Good quality.

Salesyard Prices

(Except for Golden Muscat)

2-year—35c each; 3 for \$1.00.

(For parcel post shipments where we prepay transportation add 25c for any order under \$2.50 and 10% of amount of order for orders over \$2.50. Shipment by freight or express at buyer's expense.)

RHUBARB

Rhubarb, planted in rich soil produces fine crops with very little work, for many years.

Strawberry, 15 each.

WHEN TO PLANT

Our salesyard is open from mid-October until the end of May. Evergreen shrubs, which are dug with a dirt ball, can be safely planted all through the season that we keep our yard open. Deciduous trees and shrubs, that are dug bare-rooted, can be safely planted only during the season when the leaves are off, which is usually from early November until sometime in April. Included in this class are fruit and nut trees, shade trees, berry bushes, rose bushes and most flowering shrubs. Generally speaking, trees and shrubs that are planted before Christmas will do better than those planted in the Spring. The later the planting the poorer the results unless one has plenty of water available.

To Our Mail-order Customers

Due to war conditions our salesmen will not call on you this season. We hope that our old customers will order direct.

NO C. O. D. SHIPMENTS. Due to severe labor shortage we cannot spare the clerical help needed for hundreds of C.O.D. shipments. Please either send amount of order in full with order, or send 20% with order and balance before shipping date.

Unless otherwise noted prices herein are not prepaid as in our past price lists. For parcel-post shipments, which must be prepaid, add 25c for mailing costs to all orders under \$2.50. On orders over \$2.50 add 10% of amount of order for mailing costs.

Orders that do not include amounts for mailing costs will be shipped express or freight and all larger orders should go freight or express. Please advise whether you prefer parcel post, freight, express or auto freight.

Shipments start about November 15th and run into April.

ALMONDS

Prices same as apples.

Most almond varieties are disappointing in this region but our Roy which is a variety of local origin, is well worth including in any home planting. Bears young. Soft shell.

FRUIT TREES

Nearly all lines of fruit trees are in short supply again this year. Buy early to insure getting what you want. Trees planted from mid-November through January always do better than those planted late in the spring so the buyer gains two ways by ordering early.

APPLE TREES

Apples require from 3 to 6 or 7 years to start bearing. Yellow Transparent, Yellow Delicious, Wagener and Jonathan come into bearing the earliest of the varieties. The following list is in approximate order of ripening.

Red June—July ripening.

Yellow Transparent—Late July.

Gravenstein—Late August.

Red Gravenstein—Late August.

King—September-October.

Jonathan—October.

Winter Banana—October-November.

McIntosh—October-November.

Wagener—November; good keeper.

Red Delicious—November-December.

Yellow Delicious—November-December.

Yellow Bellfleur—November-December.

Spitzenberg—November-December.

Northern Spy—November-January.

Snow—November-January.

Winesap—January-March.

Stayman Winesap—January-March.

Rome Beauty—Keeps until late spring.

Red Rome—Keeps till late spring.

Rhode Island Greening—Late keeper.

Hyslop—Crabapple.

Transcendent—Crabapple.

Salesyard Prices

2-year branched trees—\$1.50 each.

1-year 4 to 6 ft trees—\$1.00 each.

(We can pack about 10 two-year fruit trees in a parcel that will go by parcel post, by pruning the tops some. If parcel-post shipment is wanted include 10% of amount of order to cover mailing costs, on orders over \$2.50. Under \$2.50 add 25c to order to cover mailing costs. Otherwise we can ship by express or freight and buyer pay the freight when he gets his shipment.)

PEARS

Pears are in very short supply all through the nursery trade. We have a small supply of two-year branched trees in following varieties:

Bartlett—Leading cannery variety and best home variety.

Bosc—A high grade fall pear ripening a month after Bartlett.

Anjou—High grade winter pear.

Salesyard Price

2-year trees—\$1.50 each.

QUINCE

Two-year trees—\$1.50.

CHERRY TREES

Lambert—Best dark cherry for Willamette Valley.

Royal Anne—Leading commercial canning cherry.

Hoskins—A dark cherry resembling Bing. An excellent pollinizer for the other sweet cherries, which will not bear without a pollinizer.

Kentish—A fine pie cherry—a so-called sour cherry.

Montmorency—A fine pie cherry.

Salesyard Prices

2-year branched trees, \$1.50 each.

1-year 4 to 6 ft. whips, \$1.00 each.

1-year 3 to 4 ft., 75.

(Prices listed herein are salesyard prices. For prepaid parcel post add 25c to any order under \$2.50 and 10% of order for orders over \$2.50 and we will prepay shipping costs. Or we can ship at salesyard prices and buyer pays the express or freight when shipment arrives at his depot.)

PLUMS AND PRUNES

Burbank—Early and productive.

Date—Fine sweet prune of Petite type, but larger.

Green Gage—Green flesh. Ripens in August. High quality.

Italian—Our leading prune. Fine for canning.

Nobel—A fine large sweet prune of recent introduction.

Peach Plum—Large, fairly early.

Santa Rosa—Large blue variety ripening in midsummer.

Satsuma—Red skin and flesh.

Salesyard Prices

2-year branched trees.....\$1.50

1-year 6 to 8 ft.....1.25

1-year 4 to 6 ft.....1.00

1-year 3 to 4 ft......75

	10	100
Each	Rate	Rate
2-year branched trees.....\$1.50		
1-year 6 to 8 ft.....1.25	\$1.00	\$ .90
1-year 4 to 6 ft.....1.00	.90	.75
1-year 3 to 4 ft......75	.75	.60

TWO-YEAR FRUIT TREES

Fruit trees have been scarce the past two years and are this year. The nurseries do not have enough help to grow their usual quantities. Two-year branched trees are especially scarce through the trade due to the fact that most nurseries sold their yearlings out last spring. We are fortunate to have a fair supply of two-year apple, pear and plums, having held back part of our yearlings last spring.

APRICOTS

Apricots are less dependable than peaches in west of the Cascades sections but still are worth while as family orchard trees.

Tilton—A large fruiting commercial variety.

Perfection—A new variety claimed to be especially suited to west of the mountains conditions.

Prices—same as peaches.

GRAFTED FRANQUETTE WALNUTS

Walnuts are almost off the market this year. We have a few nice trees.

4 to 6 ft. ....\$2.25

3 to 4 ft. ....1.50

2 to 3 ft. .... .75

Nursery Stock Shortage

Most nursery stocks are in very short supply. This applies especially to berry plants and fruit trees. The nurseries cannot compete with war industries for labor and are running very short-handed. Many have been forced out of business. Many items will be sold out very early. Whether you buy from us or from others our advice is to order early to avoid disappointment.

COMBINATION FRUIT TREES

These are trees with two or three varieties on a single tree. They make splendid backyard trees, where space does not permit the grower to plant an assortment of fruit trees.

We offer the following combinations:

Apple

Gravenstein—Northern Spy—Yellow Delicious

Red Delicious—Spitzenberg—Red Gravenstein

Yellow Delicious—Yellow Transparent—Hyslop Crabapple

Gravenstein—Yellow Delicious—King

Red Delicious—Red Gravenstein—Red Rome

King—Yellow Transparent—Jonathan

King—Gravenstein—Yellow Transparent

Gravenstein—King

Jonathan—King

Red Delicious—Red Rome

Yellow Delicious—Red Gravenstein

Yellow Delicious—Gravenstein

Cherries

Royal Anne—Hoskins—Lambert

Hoskins—Lambert

Hoskins—Royal Anne

Hoskins is a black cherry, similar to Bing. It is also an excellent pollinizer for both Royal Anne and Lambert.

Salesyard Prices

2 variety trees.....\$2.00 each

3 variety trees..... 2.50 each

Extra select cherry..... 3.50 each

The extra select are older trees and are available only in three-variety cherry. Supply limited.

We can ship the combination apple trees by parcel post, cherries are too large to go by parcel post. Above prices do not include transportation. For parcel post shipment add 25c to order under \$2.50 and 10% of order to larger orders. Orders including combination cherry must go by express or freight at buyer's expense.

PEACH TREES

Peach trees are in very short supply this year. We have a fair assortment of varieties for home orchard needs but not much for larger commercial orders. Next year we will have a large production of peach trees.

Varities in approximate order of ripening.

Mayflower—White flesh. Very early.

Triumph—First yellow fleshed variety. Profitic.

Golden Jubilee—Good yellow freestone. Early.

Rochester—Early yellow. Freestone. Very hardy. Fine for western Washington conditions.

Slappy—Yellow. Canning variety.

Early Crawford—Yellow freestone.

Champion—Fine white meated.

Carmel—Melting white flesh. Excellent.

Improved Elberta—Leading commercial variety but too subject to leaf curl for the amateur.

J. H. Hale—Yellow. Canner.

Veteran—A fine new variety highly recommended by Washington Experiment Station for western Washington conditions.

Southhaven—A fine yellow meated freestone of recent introduction.

Late Crawford—Yellow freestone.

5 to 6 ft. high.....\$1.00 \$ .90 \$ .85 \$ .75

4 to 5 ft. .... .90 .80 .75 .65

Probably more filberts of the tip-layered type are planted in the Willamette Valley than any other type of propagation. The root is lighter than the transplanted types. Some believe that they produce fewer suckers. Fine results usually obtain when planted in winter and protected by tree shade.

Barcelona Transplants

Each 10 100

Rate Rate Rate Rate

2 to 3 ft. .... .80 .70 .60

Transplants have a root system a year or two older than have the tip-layers. Supply very limited.

ROYAL FILBERTS

Royal is the largest of the Filberts, being considerably larger than Barcelona. It is a thin shelled nut. It is one of the best pollinizers for Barcelona. Self-husking. Productive. We recommend this variety as a pollinizer with Barcelona, using a Royal every third tree in every third row. It is far more productive than any other of the pollenizing varieties. Available in tip-layered trees only. Many growers are using this splendid variety as a main crop variety.
